Gujarat Technology University

PROJECTS

Weather-web

Weather-Web

2025

A responsive weather application built using HTML, CSS, and JavaScript, with real-time data fetched from an external Weather API. This project allows users to search for any city and view current weather conditions instantly.

ABC Buddy

ABC Buddy

2025

An interactive and playful web-based ABCD learning tool for kids, built by Savan Rathod. Each alphabet triggers a sound and drops a related image with animation—making learning fun and engaging!

LIVE https://acbwithfun.netlify.app/

Portfolio

Portfolio

2025

I developed a responsive and visually polished portfolio website using React.js, leveraging a modular component-based architecture for scalability and maintainability. The site showcases my front-end development skills through reusable components such as a dynamic hero section, animated service cards, and interactive UI elements.
